PROFESSIONAL SUMMARY

Computer Science undergraduate with hands on experience building full stack web, mobile and cloud enabled applications across software engineering, AI enabled platforms and distributed systems. Strong foundation in Java and object oriented development, complemented by practical work with React, Next.js, NestJS, FastAPI, PHP, SQL databases, Docker and Kubernetes. Project experience includes AI powered digital fashion, school management, logistics and shipment tracking, responsive client websites and digital experience platforms. Certified Master Java Developer (CMJD) with additional exposure to SOLID principles, layered architecture, design patterns, data structures, Spring Framework, Hibernate/ORM, JDBC and Java EE. Interested in software engineering and full stack development roles where scalable architecture, clean code and user focused product development are valued.

EDUCATION

- **B.Sc. in Computer Science** **2023 - Present**
  University of Colombo School of Computing (UCSC), Colombo, Sri Lanka
- **Software Engineering Program** **2026**
  Institute of Java and Software Engineering (IJSE), Galle, Sri Lanka
- **G.C.E. Advanced Level - Physical Science Stream** **2022**
  Mahinda College, Galle
  Results - (Combined Mathematics - A, Chemistry - B, Physics - B, General English - C)

TECHNICAL SKILLS

- **Languages** - Java, JavaScript, Python, PHP, TypeScript, SQL, HTML5, CSS3
- **Frontend** - React.js, React Native, Next.js, Tailwind CSS
- **Backend & APIs** - NestJS, FastAPI, Spring Boot, Java EE, JDBC, Hibernate / ORM
- **AI & LLM Integration** – Anthropic Claude API, RAG (Retrieval-Augmented Generation), Tool/Function Calling, Prompt Engineering
- **Databases & Storage** - PostgreSQL, MySQL, NeonDB, Supabase, Prisma ORM, Cloudflare R2, Cloudinary
- **DevOps & Messaging** - Docker, Kubernetes, RabbitMQ, Vercel, Git, GitHub
- **Engineering Practices** - Object Oriented Programming, SOLID, layered architecture, MVC, design patterns, REST/API integration, version control
- **Tools** - VS Code, Postman, Photoshop

CERTIFICATION

Certified Master Java Developer (CMJD)
Institute of Java and Software Engineering (IJSE)

- Built a strong foundation in object oriented design and software design principles including SOLID, layered architecture and common design patterns.
- Studied data structures and algorithms from first principles, including implementation of core structures and analysis of complexity.
- Developed enterprise Java depth across Spring Framework, Hibernate/ORM, JDBC, Java EE and multi tier application development.

ACHIEVEMENTS & LEADERSHIP

- Former School Badminton Team Captain.
- Participated in District, Provincial and National Level Badminton Tournaments.
- Earned certificates for competitive badminton achievements at school and higher levels

SELECTED PROJECTS

Serendeva - AI & VR Digital Wardrobe Platform
Tech Stack - React Native, Next.js, NestJS, Python, PostgreSQL, Prisma ORM, Cloudflare R2

- Developed an AI powered digital wardrobe platform featuring virtual wardrobe management, personalized outfit recommendations, and AI driven size intelligence.
- Built scalable web and mobile application components using Next.js, React Native, NestJS, FastAPI, and PostgreSQL, including 3D avatar based fashion experiences.
- Developed a B2B fashion intelligence layer supporting cross vendor size mapping

Iskole - School Management System
Tech Stack - PHP, MySQL, Docker, MVC Architecture

- Built a role based school management system designed for Sri Lankan schools.
- Developed modules for marks, attendance, timetables, reports and announcements.
- Implemented secure authentication and session management within the application workflow.

SwiftLogistics - Logistics & Shipment Tracking System
Tech Stack - JavaScript, Python, RabbitMQ, Docker, Kubernetes, HTML

- Developed a scalable logistics and shipment tracking system covering shipment, warehouse and order management through a microservices based backend architecture.
- Implemented containerized deployment using Docker and Kubernetes, with RabbitMQ supporting reliable communication across distributed application services.

WearAI – AI Powered Clothing E-Commerce Platform (In Progress)
Tech Stack: Next.js, TypeScript, Tailwind CSS, Python(FastAPI), PostgreSQL , PayHere, Docker

- Developing a full stack clothing e-commerce platform with a responsive storefront, API first backend, and streamlined product browsing, cart, and checkout workflows.
- Applying structured Git and CI practices while planning an AI powered shopping assistant using RAG and tool calling for product discovery and real-time stock checks.

FoodExpress Backend - Online Food Ordering System
Tech Stack - Java 21, Spring Boot, Spring Data JPA, Spring Security, JWT, MySQL, Maven

- Developed a Spring Boot backend for an online food ordering system with role based ADMIN and CUSTOMER access, secured through JWT authentication and authorization.
- Built RESTful APIs for food, category, cart, order, payment, and cancellation workflows using a layered Controller Service Repository architecture with MySQL and Spring Data JPA.

LANGUAGES

- English - Professional Proficiency
- Sinhala - Native
